

No other solutions are as advanced or BI ready

Magnitude's SimbaO2X

Access Your OLE DB for OLAP (ODBO) for XML Analysis (XMLA) Data Source

Magnitude's SimbaO2X is a cost effective way to bridge the gap between an ODBO-enabled application and a data source exposed via XMLA. It allows Business Intelligence (BI) applications to connect to virtually any XMLA data source – standard or proprietary – in a web services environment. Many ISVs have chosen to simplify the process of adding XMLA support using our SimbaProvider SDK. This XMLA toolkit allows ISV's to build a combined ODBO and XMLA provider quickly and efficiently, so that their OLAP products support industry standard APIs and can connect to products such as Microsoft Excel. The result is that their customers gain access to the greatest variety of OLAP and BI query and reporting tools in the market.

Product Highlights

- Client-side driver capable of connecting to multi-dimensional data sources
- Supports numerous ODBO consumers, most importantly Microsoft Excel 2013 / 2010 / 2007 / 2003
- Easy installation and configuration process

Product Features

- Client-side driver capable of connecting to multi-dimensional data sources
- XML for Analysis (XMLA) Compliant
- Both 32-bit and 64-bit OLE DB for OLAP (ODBO) Compliant
- MDX 1999 and MDX 2005 query language standards Compliant
- Supports numerous ODBO consumers, most importantly Microsoft Excel 2013 / 2010 / 2007 / 2003
- Supports connectivity to a wide variety of XMLA data sources, and virtually any data source using a XMLA provider built using Simba's MDX Language Software
- Development Kit (SDK)
- No Data Source Name (DNS) required, just enter the URL of the data source and go!

Product Specifications

Minimum System Requirements

- Microsoft Windows® XP or later (either 32-bit or 64-bit)
- 10 MB of disk space
- Microsoft .NET Framework 1.1 or later
- ODBO compliant application
- Data source with XMLA interface
