

Connect to your Salesforce data from SAP® Data Services.

Salesforce Adapter for SAP® Data Services

Enables access directly to data, without extraction, via Salesforce's native web services Application Programming Interface (API)

Deliver scalability, full application functionality, and live analytic capabilities to users. Built upon the SimbaEngine SDK framework, the Magnitude's Simba Salesforce Adapter for SAP Data Services powers comprehensive analytics and reporting by leveraging Simba's experience and knowledge working with Salesforce.com.

The Magnitude's Simba Salesforce Adapter for SAP Data Services delivers the full functionality of SAP DS and SQL, while passing down supported operations to Salesforce for increased performance thanks to Magnitude's Simba built-in Collaborative Query Execution (CQE) feature. This CQE pass-down allows the adapter and Salesforce to collaborate dynamically on the execution of SQL queries, eliminating redundant processing and passing on performance gains to users.

The Magnitude's Simba Salesforce Adapter is currently released as a Developer's Preview.

Product Highlights

- Connects via Salesforce's native web services API
- Direct connectivity to data without extraction
- Provides full table and query metadata
- Enables faster performance by doing more processing where your data is, in Salesforce.
- Uses the DS adapter API which allows for bulk processing making it faster and **reducing Salesforce API calls** compared to ODBC.

Product Features

- Pass down Performance Optimization for Projection, Filters, Joins
- Support for Salesforce Bulk API: Insert, Update, Upsert, Delete
- Improved metadata browsing performance
- Improved subscription/checkpointing support for Changed Data Capture
- Improved user interface descriptions
- Improved error messages
- Improved Autocorrect Loads (upserts) with External ID fields

Product Features (cont.)

- Improved binary data support
- Improved handling of partial field mapping into target tables.

Product Specifications

- Supports Salesforce API Summer 16 (API 37)
- Supports 32- and 64-bit applications
- Supports multiple platforms, including Windows Server 2008, 2008 R2, 2012, or 2012 R2 (64-bit AMD/Intel); SUSE Linux SLES 11 (64-bit AMD/Intel); SUSE RedHat EL 5 or 6 (64-bit AMD/Intel); IBM AIX 6.1 or 7.1 (POWER); Solaris 10 or 11 (SPARC)
- REST and Bulk API, the driver uses the REST API and Bulk API for data retrieval

To connect data sources and applications for anytime, anywhere access, turn to Magnitude's Simba connectivity solutions.
