

SQL Server ODBC Driver

Access, analyze, and report on SQL Server with your SQL-based BI tool of choice.

Magnitude's Simba ODBC driver for SQL Server.

The Magnitude's Simba Microsoft SQL Server ODBC Driver provides SQL access directly to SQL Server data on Windows, Linux, and Mac platforms. With the Simba Microsoft SQL Server ODBC Driver, you can deliver scalability, full BI application functionality, and real-time analytics to users. The Simba Microsoft SQL Server ODBC Driver is built with the SimbaEngine SDK, the industry-leading connectivity development environment.

The Magnitude's Simba Microsoft SQL Server ODBC Driver is ODBC 3.8 data-standard compliant, and includes important functionality like support for OSX and 32- and 64-bit capability for high-performance cloud-computing environments.

How it works

The Magnitude's Simba SQL Server ODBC Driver enables Business Intelligence (BI), analytics, and reporting on data that is stored in Microsoft SQL Server databases by providing native connectivity from Windows, Mac and Linux.

Product Highlights

- Offers direct SQL BI connectivity to SQL Server data via the ODBC API, with no extraction needed.
- Complies with the latest ODBC 3.80 data standard, which includes support for asynchronous execution.
- Supports Mac, Windows and Linux platforms.

Product Features

- Automatic mapping between common SQL Server data types and ANSI SQL data types.
- Supports encrypted communication with SQL Server over SSL.
- Supports Kerberos authentication.
- Flexible driver level logging and ODBC tracing.
- Supports HierarchyID and DateTimeOffset types.

Product Specifications

- Supports 32- and 64-bit applications.
- ODBC Driver compliant with the latest ODBC 3.8 specification.
- Supports Unicode.
- Tested with SQL Server 2005 to 2014.
- Supported on Windows 7 SP1, 8, or 8.1, Windows Server 2008 R2 SP1, 2012, or 2012 R2.
- Supported on Red Hat Enterprise Linux 5,6, or 7, CentOS 5, 6, or 7, SUSE Enterprise Server 11 or 12, Ubuntu 12.04 or 14.04, Debian 7.
- Support for iODBC 3.52.7 or later, or unixODBC 2.3.0 or later.
- Support for Mac OS X 10.9 or 10.10.

About Magnitude

Magnitude Software leads the way in delivering corporate performance insights with solutions for corporate performance management (CPM), master data management (MDM) and data connectivity in heterogeneous environments. The Company's software and solutions drive real business results for hundreds of thousands of users around the globe. Magnitude's family of award-winning applications includes business intelligence, data warehousing, master data management, analytics and reporting, plus our Simba connectivity solutions.
