

Analyze and report your Salesforce.com data

Salesforce ODBC & JDBC Drivers

Easy SQL access to Salesforce.com: Enable users to access, analyze, and report on data with the SQL-based tool of choice.

Deliver scalability, full application functionality and real-time analytic capabilities to users. Built upon the SimbaEngine SDK framework, the drivers power comprehensive analytics and reporting.

Perform necessary joins and aggregations which passes down supported operations to Salesforce for increased performance via Simba's built-in Collaborative Query Execution (CQE) feature. This allows Salesforce to collaborate dynamically on the execution of SQL queries, eliminating redundant processing and passing on the performance gains to users. If an application is Salesforce Object Query Language (SOQL) aware.

The Magnitude's Simba ODBC and JDBC drivers for Salesforce.com are configurable to pass the query through. The ODBC driver for Salesforce complies with the latest ODBC 3.8 data standard and adds important functionality such as Unicode and 32- and 64-bit support for high-performance, cloud computing environments. The JDBC driver for Salesforce.com includes support for JDBC 4.0.

Product Highlights

- Connects via Salesforce's native web services API
- Complies with the latest ODBC 3.8 data standard
- Adds aggregation and join capabilities for queries
- Direct BI connectivity to data without extraction
- JDBC driver supports JDBC 4.0

Product Features

- Direct BI connectivity to data without extraction
- Full compatibility with leading analytic/reporting apps, including Microsoft Excel & Access, Tableau, Power BI, Qlik and more
- Provides full driver and query metadata
- Adds aggregation and join capabilities for queries
- Passes down supported operations for increased performance
- Support for ODBC 3.8

Product Specifications

- Supports Salesforce API Summer 16 (API 37)
- Supports 32- and 64-bit applications
- Complies with latest ODBC 3.8 specification
- Supports Unicode
- Supports multiple platforms, including Windows, Linux and Mac OS X
- Supports ANSI SQL-92
- Connects via Salesforce's native web services API

To connect data sources and applications for anytime, anywhere access, turn to Magnitude's Simba connectivity solutions.
