**Feed your PivotTables® live enterprise data.
Make better decisions, faster with**

Simba MDX Provider for Oracle OLAP

ORACLE PARTNER

The Data Access and Analytics Experts

Simba MDX Provider for Oracle OLAP

Make better, faster decisions by automatically feeding your Excel PivotTables with real-time data from your company's Oracle data warehouse.

The Familiar and Powerful Capabilities of Excel – Powered by Your Real-Time Enterprise Data

Now you can use the powerful ad hoc query and analysis capabilities of Microsoft® Excel® PivotTables® and PivotCharts® with your Oracle® 11g or later OLAP business intelligence data. Using Excel with Simba MDX Provider for Oracle OLAP, you can slice, dice, pivot and gain meaningful insight from your Oracle data the same way that you would if you were connecting Excel directly to Microsoft Analysis Services or SAP® NetWeaver® BW.

Take your data analysis to a new level with the latest Excel 2013 functionality, including timelines, slicers, sparklines, named sets and drill-through. You can also hot-link your Excel data to other Microsoft Office applications like Word and PowerPoint® – imagine a sales analysis chart in PowerPoint that updates automatically, via the connected Excel sheet, as new sales transactions are recorded in Oracle. Published reports and presentations need never become out of date again.

Don't Waste Time Learning Yet Another BI Tool

Gain the choice of which BI tool to use to analyze and report on your data. Simba MDX Provider for Oracle OLAP is an open OLAP connectivity solution for many MDX query language emitting clients, so you can continue to use the tools you're familiar with. It supports tools such as Microsoft Excel 2013, Excel 2010, Excel 2007, Excel 2003, arcplan Enterprise, Bissantz Deltamaster and SAP BusinessObjects, with Oracle Database OLAP Option.

Control the Dangerous Proliferation of Out-of-Date Spreadsheets

Direct connectivity to live data means that you don't have to load a static copy of your data into Excel or a mid-tier server. Critical Excel files are always up-to-date with your current enterprise data. In addition, Simba MDX Provider for Oracle OLAP preserves all security policies set by your Oracle Database Administrator to ensure your data stays protected.

Since Simba MDX Provider for Oracle OLAP fully supports Excel thin-client deployment (Excel Services) and integration with the SharePoint® platform, you can securely distribute reports to other users.

Save Time and Money with a Solution that's Easy to Deploy, Low Cost and Requires No Training

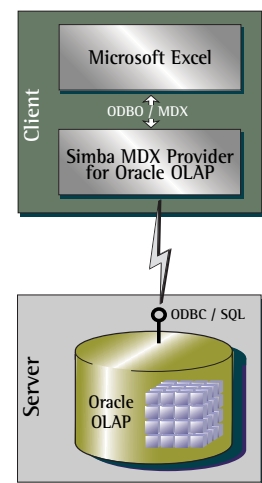

Why use an expensive mid-tier server when you can connect directly to your Oracle data cube? And why use other spreadsheet tools and add-ins with different user paradigms when you can use Excel itself? Simba MDX Provider for Oracle OLAP has low total cost of ownership. As a client-side driver, it's easy to deploy, cost effective and low maintenance. No additional mid-tier servers or add-ins are needed. No special training is required. If users are familiar with Microsoft Excel PivotTables, accessing Oracle data is the same as Excel connecting to any data source.

How to Get It

Simba MDX Provider for Oracle OLAP is sold directly by Simba Technologies. For a video demo, evaluation, or additional product and purchasing information, visit: www.simba.com/Oracle.

Direct, Live Connectivity

Simba MDX Provider for Oracle OLAP is an easy to install driver for your PC. It directly connects familiar Business Intelligence (BI) applications like Microsoft Excel to your Oracle OLAP database for powerful ad hoc query and analysis.

Architecture
