Magnitude Gateway, a disruptive approach to connecting applications and data sources, delivers a simplified customer experience that puts immediate data access from many data sources at the fingertips of business users.

Magnitude Gateway simplifies provisioning and maintenance of connectivity to a multitude of data sources and improves the customer experience. Provide instant, self-service access to operational and customer data wherever it resides — delivering unified data access to business users — without heavy implementation and maintenance requirements.

"Accessing quality data and delivering it quickly enough to business users when they need it most remains a fundamental challenge for most enterprises. Magnitude Gateway solves this by making it easy for any organization to manage data source access for all users so they can uncover and act on insights immediately."

Darren Peirce
CTO, Magnitude
HOW IT WORKS

Agile businesses need to provide self-service data access to eliminate the barriers to data and make teams more self-sufficient. Magnitude Gateway enables self-serve access to real-time data from multiple data sources when, where and how business users need it.

Brought to you by Magnitude’s Simba Technologies team, Magnitude Gateway eliminates the fragmented effort of data source driver acquisition and updates, driving down costs, improving efficiency and eliminating IT bottlenecks. What’s more, Magnitude Gateway relieves the burden of driver updates as maintenance is centralized within the platform.

DATA CONNECTIVITY REIMAGINED

Dramatically enhance the user experience while simplifying set up and maintenance of data connectivity solutions.

**Save time and reduce burden on IT:** Quickly provision users with real-time access to the data they need without the burden of configuration.

**Support data compliance initiatives:** Ensure internal and external data policy compliance.

**Get users to business insights faster:** Provide a business view of data (beyond access to raw data), irrespective of the analytic tool utilized.

**Minimize costs** of maintaining up-to-date connectivity to your mission-critical applications and workflows.

Enable immediate value from the data your business users access. Dramatically decrease what it takes to configure and support access to that data. Do it all with fewer resources and less expense with Magnitude Gateway. We’re the people who understand connectivity best. After all, 100% of 2018 Gartner BI MQ leaders partners with Magnitude and our Simba Technologies team for real-time data access.

Magnitude’s transformative approach to unified application data management delivers vast operational efficiencies to business application data access, management, analytics and reporting for the modern enterprise. Magnitude’s portfolio of products includes: simplified application data access to any data source; data management solutions for SAP and commerce verticals; simplified master data harmonization and governance; and packaged application analytics and reporting solutions for SAP and Oracle. The company helps thousands of business users simplify management of their data and deliver on the substantial productivity gains these applications originally promised.
